

Danny Bui

Fullstack Test Engineer | Automation Test Engineer

ABOUT ME

Full-stack Test Engineer with extensive experience verifying large-scale backend systems and APIs. Proficient in manual and automated testing, API validation, requirements analysis, and SQL verification. With a strong software development background, I collaborate closely with development teams to reduce defect leakage, improve release stability, and deliver robust, high-quality software.

ACADEMIC HISTORY

FPT University (HCMC Campus) | 2020 - 2024

Bachelor in Software Engineering

- GPA 7.5

LANGUAGES

- Vietnamese (Native)
- English (Intermediate)
- Chinese (HSK4)

TECHNICAL SKILLS

- Automation Testing:** Playwright, Unit Testing (JUnit, xUnit)
- Manual Testing:** Test design, regression, UI testing, workflow validation
- System Testing:** Log analysis
- Program Language:** Java, C# (ASP.NET), Dart (Flutter)
- Database:** MSSQL, PostgreSQL
- Cloud & Tools:** Firebase, GitHub, Postman, Swagger, Mantis, PLane

EXPERIENCES

Straits Financial (HCMC) | 04/2026 - present

Automation Test Engineer

- Team size: 5
- Develop and maintain automated test scripts, perform regression testing, and collaborate with the development team to ensure software quality.
- Perform API and database testing using Postman and SQL to ensure backend logic and data integrity.
- Analyze system logs to trace root causes and track bug lifecycles via Mantis/PLane.

ISV Vietnam (HCMC) | 02/2025 - 04/2026

SDET & Backend Developer

- Team size: 5
- Handle requirement analysis, test planning, test cases, and test scenarios, API testing (Postman), functional and regression testing, and SQL data validation for the PulseAI system, and track defects using Mantis.
- Develop and optimize web applications using .NET and Node.js to ensure high performance and scalability.
- Build and maintain RESTful/GraphQL APIs, implementing robust Unit Tests to ensure data integrity and system stability.
- Developed and maintained automated tests using Playwright for core system features, ensuring high stability and reducing manual regression testing time.
